### 1. Gather Your QuickBooks Account Details

- Your **Company Name** and **Subscription Level** (e.g. QuickBooks Online Advanced)
- **Registered Email** or **User ID**
- **Registered Support PIN**, if you have one

### 2. Define the Issue Clearly

- **What:** Error message, missing data, report inconsistencies
- **When:** Date/time of occurrence, recent changes made
- **Impact:** Single user? Entire team? One module or entire company?

### 3. Collect Supporting Materials

- Screenshots of errors or unexpected behavior
- A short recording (optional) demonstrating the problem
- Data files or transaction IDs involved

### 4. Check Basic Troubleshooting

Attempt simple fixes first:

- Clear cache / try a different browser

- Log out and back in
  - Check one user's access versus another  
This ensures your call with support is focused and efficient.

### Step 1: Find the Official Line

- Dial **1-888-394-9046**
- Use a quiet space to avoid background noise—especially important if screen sharing is needed

### Step 2: Navigate the Menu

- Voice prompt may ask: “Are you a QuickBooks Online user?”
- Select option for “**Advanced**” (might be “Option 2” or similar)

### Step 3: Identify Yourself

Support will verify:

- Your **email** or **user credentials**
- Possibly ask your **Support PIN**—if prompted, open QuickBooks, click the “Help” (?) icon, select “Contact Us,” and generate a PIN

### Step 4: Describe Your Issue

Provide:

- A **concise summary**: “I’m getting error ‘XYZ’ when exporting Reports.”
- Context: How your team uses the module, recent changes

- Attachments: Offer screenshots or recordings; use QuickBooks' "Share Data" tools if you plan a session

## **Step 5: Allow Troubleshooting**

You may experience:

- Real-time guidance while navigating QuickBooks
- Screen-sharing or remote-assist (with permission)
- A ticket number or follow-up instructions

## **Step 6: Confirm Resolution or Next Steps**

- Ask: "Has this resolved it for all users?"
  - If unresolved, ask for escalation process or estimated response time
-

## **Save Important Info**

- Ticket number or reference ID
- Name of the agent or specialist
- Steps taken and current status

## **Double-Check Fixes**

- Re-test the exact workflow that was failing
- Check impact on other users or modules

## **Record the Fix**

- Create an internal knowledge note so similar issues are resolved more quickly in the future
- Note agent recommendations and version numbers

## Follow-Up If Needed

- If unresolved by expected date, call back at **1-888-394-9046**
- Ask directly: “I’m following up on ticket #123456. What’s the status?”

## Provide Feedback

QuickBooks asks: “How was your experience?”

- Rate politely (helps them improve)
  - Provide a brief comment on clarity, professionalism, helpfulness
-

## Page 6: Advanced Tips, Common Issues & Troubleshooting Checklist

### Top Advanced-Level Issues

Issue	Quick Fix Tip
Custom report export fails or damages formatting	Use the “Rebuild” or “Refresh fields” buttons
Integration errors (e.g., Shopify, Salesforce)	Disconnect/reconnect the integration in “Apps” section
Missing data for certain users	Check user access rights—Advanced allows granular roles
Bulk transaction import reports odd totals	Export & review CSV file format; run “Validate Data” tool

### Troubleshooting Checklist

1. Is your internet stable?

2. Browser: Cache cleared? Try incognito or another browser
3. All users on same version? Mobile/app vs. desktop UI differences
4. Integration software updated? Many add-on issues stem from ops outside QuickBooks
5. Screenshots or log files attached when contacting support

## Tips to Streamline Support Calls

- Have everyone stop using QuickBooks until resolution—reduces confusion
  - Tight time windows? Pre-book a callback: start the call, press “7” for callback and schedule a time slot
  - Use remote session tools to let support directly see the issue
-
