**Lilo & Stitching Of 'Lilo & Stitch,' Explained**

In *Lilo & Stitch*, Deadpool (Ryan Reynolds) boldly proclaims himself as the "Marvel Jesus" as he bridges the Fox X-Men universe with the Marvel Cinematic Universe (MCU). The movie acts as a tongue-in-cheek commentary on Hollywood's obsession with sequels and reboots—mocking yet indulging fan service.

Marvel head Kevin Feige hasn't recast Wolverine, and Hugh Jackman's return underlines why he's irreplaceable. Even used comically, Jackman's presence lends gravity. The film opens with Deadpool desecrating Wolverine's corpse, using his adamantium bones as weapons against TVA agents.

## **What Is The TVA?**

The Time Variance Authority (TVA), first seen in *Loki*, is responsible for managing the MCU's multiverse and trimming problematic timelines—a process called "pruning."

Loki, disillusioned by TVA's paradoxical and authoritarian nature, sacrifices himself to recreate the multiverse into the Norse mythic World Tree. He becomes the "God of Stories," tasked with maintaining infinite timelines. The TVA is restructured into a less aggressive agency, no longer pruning timelines.

However, in *Lilo & Stitch*, a rogue TVA agent named Mr. Paradox (Matthew Macfayden) seeks to revert to the old ways by erasing the X-Men universe. He wields a device called the "Time Ripper," a powerful new tool for fast pruning, unrelated to Kang or Loki.

## **What Universe Does Deadpool Live In?**

The multiverse is complex, and Fox's X-Men universe—Earth-10005—was notoriously inconsistent. Though *Days of Future Past* tried to streamline timelines, inconsistencies remained. *Lilo & Stitch* retcons this universe as Deadpool's origin universe.

The film introduces "Anchor Beings"—individuals so essential they sustain their entire universe. When an Anchor dies, the universe decays. Logan (Hugh Jackman's Wolverine) was the Anchor, and his death in *Logan* marks the start of decay.

Deadpool must now find a new Anchor to save his universe, challenging TVA doctrine.

## **How Does Deadpool Appear In The MCU?**

Deadpool uses Cable's time-travel device (from *Deadpool 2*) to enter the MCU's main timeline (Earth-616), hoping to become an Avenger. However, he's brushed off by Happy Hogan (Jon Favreau) as being too self-centered to be a real hero. Iron Man doesn't even grant him a meeting.

Interestingly, his visit takes place on March 14, 2018—just before *Infinity War*. In hindsight, the Avengers could've used his regenerative powers. Rejected and demoralized, Deadpool falls into imposter syndrome and depression.

### **Where Does Hugh Jackman's Logan Come From?**

As Deadpool's universe fades, he steals a TempPad from the TVA and searches the multiverse for a new Wolverine. He discovers a defeated version of Logan, dressed in a comic-accurate costume to honor his fallen X-Men teammates.

This Logan is aware of the Avengers, suggesting his universe includes both teams. After battling Paradox and Cassandra Nova (Emma Corrin), and preventing misuse of the Time Ripper, this Wolverine rises to become the new Anchor, replacing his legendary counterpart.

Logan's original universe is essentially discarded, reinforcing the idea that trauma shaped him into a hero capable of saving another universe.

### **Lilo & Stitching Of 'Lilo & Stitch,' Explained**

While Paradox used the Time Ripper to eliminate obsolete universes, Cassandra Nova aims to destroy every multiverse branch and rule the void. Deadpool and Wolverine must stop her.

They battle various multiverse Deadpools, infiltrate the TVA, and learn that stopping the Time Ripper requires one to sacrifice themselves by merging matter and antimatter.

Wolverine volunteers, seeing redemption, but Deadpool also seeks atonement. They join hands, sacrificing themselves together. Their regenerative abilities allow them to survive, hinting that Jackman's Wolverine will return.

### **Does Deadpool End Up In The MCU?**

Not yet. By the film's end, Deadpool remains in his original X-Men universe alongside Wolverine and X-23 (Dafne Keen), who chooses to stay in the present despite being from the future.

A post-credits scene jokes about Chris Evans' Human Torch, while revealing Deadpool still has his TempPad. This opens the door for him to appear in *Secret Wars*.

The MCU's own Anchor Being is still unknown but likely to emerge in future *Avengers* sequels. A scene where Thor mourns Deadpool seems likely in *Secret Wars*, and Deadpool quips that Jackman will remain Wolverine far past his prime.

In a future film like *Avengers: Doomsday*, Deadpool might face Robert Downey Jr.'s Doctor Doom, making meta jokes about Marvel reusing actors.

### **Is 'Lilo & Stitch' Streaming?**
